

Destination: *anywhere*

With speeds of up to 500 mph and cruising altitudes higher than most airliners, the Citation Encore is noted as one of the finest all round light jets ever built.

Climbing directly to 45,000 feet, the Encore leaves virtually all weather and turbulence behind. In cruise, passengers will be impressed by the quiet cabin and the overall feeling of spaciousness. The cleverly designed 'trailing-link' landing gear makes for smooth landings on runways as short as 3,500 feet and the external baggage capacity exceeds that of any other competitive aircraft.

With so much to offer, we invite you to come fly the ultimate light jet!
